AMENDMENT

Sir or Madam:

In response to the office action mailed May 21, 2003, please reexamine the above-identified application in view of the following amendment and remarks. A petition for extension of time accompanies this amendment and is hereby requested.

IN THE CLAIMS:

1. (amended) A [spectrophotometer] system for determining optical properties of an object, comprising:

a probe tip including one or more light sources and a plurality of light receivers;

a first spectrometer system receiving light from a first set of the plurality of light receivers, wherein the first set of the plurality of light receivers is arranged with respect to the one or more light sources so that the first spectrometer system generates data based on light from the object received from a first average optical depth;

a second spectrometer system receiving light from a second set of the plurality of light receivers, wherein the second set of the plurality of light receivers is arranged with respect to the one or more light sources so that the second spectrometer system generates data based on light
